Shrubbery and Other Small Vines**

PRINCESS ANNE, MD.

Dear Friends:

First we want to tell you how pleased we were to find when this past spring's business was over that we had added over 700 new customers to our long list of patrons and how much we appreciate the loyal support given us by our old customers and their friends. You know a FRIEND is any man or firm's greatest asset. We realize this and want to conduct ourselves and our nursery so as to continue making new customers and friends. We are just a human bunch of fellows here at Bountiful Ridge, some might say old-fashioned folks, anyway we appreciate any orders sent us and if once in a while we get the wrong slant on things don't forget to call our attention to it.

We have and are doing everything we can to grow some of the best stock this year that it is possible to produce. We have tried to make this the most complete price list we have ever issued and we are offering you the greatest values we have ever offered in nursery stock; values which we are sure you cannot equal anywhere else.

We are growing more than one million fruit trees in our nursery which will go into every state in the Union and Canada. For this reason we feel we have one of the most complete, up-to-date list of varieties in the various classes of fruit you can find anywhere. We do not propagate a variety till we know we have the true strain, and with the personal supervision we give our nursery at all times and our policy of labeling every item just what it is, leads us to say we can guarantee our stock to be true to name and free from disease. We take every precaution in growing and handling our stock which will bring to our patrons better satisfaction.

We cannot go further without calling your special attention to some of the more recent introductions of fruits which you will find listed elsewhere in this price list. The value of these fruits to the growers cannot be estimated. They represent the progressive nature of the American people in one of the largest and most substantial branches of agriculture and we ask that you consider them carefully when making your selection of varieties to plant this year. We have selected our ornamentals with the thought of giving everyone the opportunity of buying the tree, or shrub, or evergreen, or rhododendron which will grow into and give them greatest beauty and value for their dollar spent they have ever received in nursery stock.

The advantages of FALL PLANTING on most all classes of nursery stock cannot be ignored by the planter. Our long experience in the nursery business has possibly brought this to our attention more vividly than to most planters. We have found that by setting fruit trees which are well matured in the fall you obtain on an average 25% more growth and a much better stand and they are ready to move with the first break of spring. Remember that the roots of all plants start to grow at least one month before the leaves put forth in the spring. This same result will be experienced in the planting of nearly all classes of fruit and ornamental trees and berry plants. So we ask that you arrange to do as much planting this fall as possible; you will have more time. Prices are low as they can go and if there is any doubt in your mind about the success of any plant if planted in the fall write to us and we will say whether best to plant it or not.

In closing this personal message to you, friends, I want to ask for your continued patronage this coming Fall and Spring planting season. We shall do everything in our power to give you all satisfaction. We want you to feel you are a part of the Bountiful Ridge Nurseries. Buy you stock from us and have your friends buy theirs from us and we will try and justify this loyalty to us.

HK-B

Very truly yours,
BOUNTIFUL RIDGE NURSERIES

ASS'T. MGR.

RICHARED

TRADE MARK REG. U. S. PAT. OFF.

The DELICIOUS *Supreme*

THE FAMOUS DELICIOUS APPLE SCORES AGAIN BY GIVING TO THE PEOPLE A BLOOD-RED MUTATION THAT PROMISES TO REVOLUTIONIZE THE FUTURE OF THE DELICIOUS APPLE.

The value of this new apple to the fruit growers cannot be estimated. The Richared Delicious without a doubt is superior to all other red sports now being offered to the planters. Think of the increased profits to you if you could grade out practically 100% extra fancy apples. That is what you can do with the RICHARED DELICIOUS. Tree characteristics the same as the old delicious, but the apple is a full bright-red color, and is large. You can pick the apple two weeks earlier; you can keep the apple longer; you can ship the apple to distant markets more successfully; you have no loss from drop apples; you have an apple that will sell more readily on any market; YOU HAVE AN APPLE THAT WILL SELL AT AN ADVANCED PRICE AT ALL TIMES OVER THE OLD DELICIOUS. We say without hesitating that everyone desiring the delicious type of apple should plant the RICHARED DELICIOUS. It may mean the difference between profit and loss to you; it may mean the difference between success and failure to you. This high quality, beautifully colored sport of the old Delicious might mean everything to you in the future. We quote the letter of R. E. Trumble, consulting horticulturist of the State of Washington, where the RICHARED originated. We have thousands of RICHARED TREES this year in all grades, one and two year. We have reduced the prices again, so we say: "If you want Delicious type of apples, plant RICHARED DELICIOUS, and get your trees from BOUNTIFUL RIDGE NURSERIES."

FACTS TO BE RECOGNIZED

A FRUIT EXPERT TELLS OF THE RICHARED

Wenatchee, Washington.
I have seen and observed your new strain of Delicious, the "RICHARED," both on the original parent tree and also the apples on the young trees, and in my opinion you have the most beautiful apple in the world. It is certainly marvelous to see these—full-blood red-color in August, while Delicious on adjoining trees are still green. This added color, with advantages of earlier picking, earlier marketing, firmer apples, more extra fancies, no loss from "windfalls," and better keeping qualities, convinces me that in the "Richared" Delicious you have an apple worth millions of dollars to the apple industry of the world.

I have no hesitancy in stating that in my opinion the "Richared" Delicious will entirely replace plantings of common Delicious and that it is a better apple from every standpoint.

R. EDWARD TRIMBLE, Consulting Horticulturist.

NEW LOW PRICES ON RICHARED DELICIOUS AND BLAXTAYMAN TREES FOR FALL 1932 AND 1933

Even the best of our products have been reduced in price.

ONE-YEAR				
1-11	12-24	25-49	50-99	100-499
4-6 ft., 1 yr.....	\$.80	\$.70	\$.60	\$.50
3-4 ft., 1 yr.....	.75	.65	.55	.45
2-3 ft., 1 yr.....	.40	.30	.25	.20

TWO-YEAR				
1-11	12-24	25-49	50-99	100-499
5-7 ft., 2 yr., 11-16 in. up	\$1.00	\$.80	\$.65	\$.55
4-5 ft., 2 yr., 9-16/11-16 in.	.90	.70	.55	.45
3-4½ ft., 2 yr., 8-9-16 in.	.60	.50	.40	.30

These prices are for Richared and Blaxtayman trees delivered to you. Further discounts allowed on large quantities. Write to us if you are interested in planting some of these, the finest of all recent introductions of fruits. Give quantities and grades desired.

BLAXTAYMAN

(Trade Mark)

THE FRUIT IS EQUALLY AS LARGE OR LARGER, THE TREE EQUALLY AS THRIFTY, THE APPLE EASIER TO PRODUCE BECAUSE OF ITS FULL RED COLOR. THINK OF THESE FACTS, FRIENDS, AND THINK WHAT THEY CAN MEAN TO YOU AND EVERY OTHER FRUIT GROWER IN THE FUTURE.

Do not say this is just another new apple and continue to plant the old Stayman's Winesap, for within a few years this apple will be on the market in large quantities, and when the people know they can get the same Stayman's quality in this new SOLID RED APPLE it will outsell the old Stayman's every time. This difference in price alone will mean a nice profit to you, and you cannot afford to not plant the BLAXTAYMAN. We are no longer in the experimental stage with the BLAXTAYMAN. It is a proven variety, as is the RICHARED Delicious. In both of these new fruits the tree characteristics are the same as the parent tree. The BLAXTAYMAN colors without a stripe, a beautiful full bright red color, making it one of our most attractive apples. It gets equally as large or larger, under similar conditions, than the old Stayman's, and in general you have an apple that is bound to prove more profitable to you. We have a fine supply of these trees this year in all grades, one and two years old, and we hope that you will not fail to plant some of them if you desire the Stayman's type of fruit.

For a more detailed description of this new apple and its history send for our large descriptive catalogue. Prices are as listed above.

THE FULFILLMENT OF EVERY FRUIT GROWER'S WISH—A SOLID BRIGHT RED APPLE WITH STAYMAN'S QUALITY AND THE SAME HARDY AND PRODUCTIVE CHARACTERISTICS

One-year apple trees with nearly three months to grow. All whole root stock, the kind of tree every planter wants, the kind of tree that insures your success when planting an orchard. We have 125,000 fine one-year trees all ready to dig for your order. They are dug fresh and packed to reach you in the best of condition. TRY THEM.

THE RED ROME BEAUTY SPORTS

GALLIA BEAUTY - OHIO RED ROME - DARK RED ROME

The advantages of either growing highly colored fruit or growing green colored apples in the past few years has been clearly demonstrated to all growers, and it is with this in mind we want to call your attention to the above sports of the Rome Beauty Apple. Possibly where the Rome Beauty thrives no other apple brings as much return to the grower as this variety of apple, and with increased color the return would be much greater. There have been many variations of the Rome Beauty in color and quality, but few of them have been worth while. The Gallia Beauty Red Rome, Ohio Red Rome and Dark Red Rome seem to be the only ones to stand the test. We mean by this they have retained the size and texture of the old Rome, which is one of its valuable assets, at the same time having the same vigorous and productive tree. There is little difference in the Gallia Beauty and the genuine Ohio Red Rome, possibly the Gallia Beauty being slightly larger in size. Both are about equal in color, being a clear bright red, without the usual Rome Beauty stripe. The trees bear unusually young, and every planter will find it superior to the regular Rome Beauty. The Dark Red Rome should be planted on very light soil or on dry, high elevation, or else it will get too dark for the eastern grower. It is well adapted to the far western grower. We have received the grafts for our trees from the original trees in Ohio, and we know they are true-to-name, and we can recommend these improved Rome Beauty varieties to all our patrons where they want more color on the Rome Beauty type of apple.

FOR THE FIRST TIME WE OFFER THEM AT THE SAME PRICE AS ALL OTHER STANDARD VARIETIES

GOLDEN JUBILEE PEACH

A Development of the New Jersey Experiment Station - the Outstanding Peach of All Recent Introductions.

A HIGH QUALITY, EARLY, YELLOW, FREESTONE PEACH. THE VALUE OF THIS PEACH TO THE EASTERN AND SOUTHERN GROWER CANNOT BE ESTIMATED. A TYPICAL ELBERTA TYPE FRUIT, HIGHLY COLORED, RIPENING BEFORE CARMAN OR ABOUT FOUR WEEKS BEFORE THE REGULAR ELBERTA.

The BOUNTIFUL RIDGE NURSERIES was the first nursery to offer this peach to the planters outside of the State of New Jersey. We have watched it carefully since its introduction and it continues to show unusual merit, and today stands superior and without an equal for a peach of its season. The GOLDEN JUBILEE reaches its highest state of perfection on light sandy soils, where the elevation is not too great.

TO THE SOUTHERN PLANTERS WE WISH TO SAY you are letting millions of dollars pass by you by not planting this variety of peach more extensively. You would be able to harvest this peach and market them with no competition from any other section. "THE FIRST YELLOW FREESTONE, HIGH QUALITY PEACH TO GO ON THE MARKET."

TO THE NORTHERN GROWERS WE WISH TO SAY THAT EVERY MAN KNOWS THE VALUE OF A PEACH OF THIS SEASON. A PEACH WHICH WILL ENABLE HIM TO GO ON ANY MARKET AND COMPETE WITH SOUTHERN PEACHES AND GET A PAYING PRICE FOR THEM.

The Golden Jubilee is a second generation seedling of the Elberta crossed with the Greensboro. The tree is unusually hardy. The buds resist winter freezes well and open after Elberta, which insures a regular crop. The blossoms are self-fertile. The peach is medium to large size and firm. It has proven a good shipper. WE RECOMMEND IT TO BE PLANTED ANY PLACE WHERE OTHER PEACHES CAN BE GROWN SUCCESSFULLY.

PRICES—THE SAME AS ALL OTHER STANDARD PEACH TREES LISTED ON INSIDE OF THIS PRICE LIST. THIS IS THE YEAR FOR YOU TO PLANT THE GOLDEN JUBILEE AND GET YOUR TREES FROM THE BOUNTIFUL RIDGE NURSERIES.

The McIntosh Apple and Its Hybrids As Money Makers

EARLY McINTOSH: Typical McIntosh in appearance; not quite so good quality, ripening about DUCHESS season or six to eight weeks before regular McIntosh. Extremely thrifty tree and good cropper.

MILTON: Typical McIntosh, coloring full red; very good quality, about equal to McIntosh, being same textured apple. Tree not as vigorous as Early McIntosh. Ripens three to four weeks before McIntosh or just before Wealthy.

MELBA: Truly a McIntosh in quality and appearance, only more flat in shape, ripening a week before McIntosh. Drops badly before coloring as it should in southern districts. Vigorous tree.

LOBO: Same season as the McIntosh; larger apple, and colors a more full red than the regular McIntosh before dropping. Extra good quality. Tree equal to McIntosh. Comes recommended highly to replace the regular McIntosh for the Middle Atlantic and Southern growers.

CORTLAND: A cross between Ben Davis and McIntosh, ripening two to four weeks later than McIntosh. About equal in size, colors well, same textured fruit, but not quite as good quality. ITS MAIN QUALITY IS THAT IT HANGS TO THE TREE TILL IT IS WELL COLORED AND WILL SELL AS McINTOSH ON THE MARKETS.

MACOUN: Very highly colored, having no stripe. Same quality as McIntosh, same textured fruit, hangs to tree better than McIntosh, and ripens two to three weeks after Cortland. Tree about equal to McIntosh, a regular bearer, and strongly recommended to lengthen the McIntosh season and give the Middle Atlantic and Southern growers a McIntosh type fruit they can grow successfully.

WE OFFER ALL OF THE ABOVE HYBRIDS AT NO ADVANCED PRICE OVER OUR REGULAR VARIETIES.

RASPBERRY PLANTS

We are now growing several million strawberry plants each year for our patrons and putting into practice the many years of experience we have had in producing a general line of nursery stock to grow thrifty and true-to-name strawberry plants, and we believe we are in a position to serve you in your wants of plants equally as well or better than other plant growers. Because of present conditions and the policy of some nurseries to give low prices at the last minute in order to be under their competitors, we cannot give any prices at this time and be fair to you and ourselves, so we are listing the varieties we shall have to offer this year and ask that where you are interested in plants for fall planting that you write to us giving quantities and varieties you wish, at which time prices will be established on a fair basis to all. WE DO NOT GROW ANY POTTED PLANTS. All plants offered are field grown. We can start shipping September 1st and will continue shipping till June 1, 1933. Our prices for spring orders will be made in December, and any order that you might place for spring shipment earlier than December will be given the advantage of these new spring prices for 1933. Our plants will be fine this year and we hope you will give us your orders. WE TAKE THE POSITION WE HAVE BECAUSE, KNOWING THE PLANT SITUATION AS WE DO, IT IS THE ONLY WAY WE CAN BE FAIR TO YOU, AND WE WANT EVERY PATRON OF THE BOUNTIFUL RIDGE NURSERIES TO PLACE HIS ORDER WITH US HAVING THE FEELING THAT HE IS GOING TO GET QUALITY STOCK AND AS MUCH OR MORE FOR HIS DOLLAR THAN HE CAN POSSIBLY GET ELSEWHERE. We shall appreciate any order you can send to us.

RHODODENDRONS AND OTHER BROAD-LEAFED EVERGREENS

Here we have plants that combine the beauty of bright green foliage with gorgeous flowers and red berries. Either for foundation plantings or specimen plants and trees, these species of plants are outstanding and fill a place all their own in all ornamental plantings. You should have them in your home planting. They are hardy and thrifty, and the prices are low in comparison with what you can buy them for elsewhere.

Health, Profitable and Permanent Investment, Beautiful Surroundings and Happiness

Are All to Be Had By The Judicious Planting of Bountiful Ridge Nursery Grown Fruits and Ornamentals

APPLE TREES

The superiority of the apple to most other fruits has been well demonstrated within the last few years. No other fruit can be put to the general and satisfactory use that the apple can. No other fruit has the health-giving qualities of the apple, whether used by young or old people, or in whatever form they may be eaten, and for these reasons the apple will always be one of the most profitable fruits for the American farmer and orchardist to grow. We have long specialized in the growing of fruit trees, producing and selling to the planters, local and national, some apple trees than any other species of fruit trees we have today in our nursery nearly 200,000 apple trees ready for planting, whether they be small home owners or large commercial orchardists. Apple trees being one of our largest specialties, we have given them a great deal of study, combining our knowledge with that of the most eminent horticulturists of the United States, and we have tried to apply the scientific information so gathered towards the production of vigorous, sturdy true-to-name trees and selecting varieties which we can well recommend to the planters, from the standpoint of QUALITY, PRODUCTION, and profits to the grower.

We do not say that every variety listed is adapted to all sections of the country, but we do say that wherever you are located you will find some varieties listed here that should be planted in preference to others in your section.

We can supply your needs this year, whether you wish single, thrifty one-year trees or the larger, well-branched two-year stock. We want you to try them. They are grown and handled so as to give you satisfaction. Don't neglect the newer introductions as listed in this prime list—pages 3 and 4. Plant them for the future apple market. For the Virginia, West Virginia and southern Pennsylvania orchardists we have thousands of extra fine York Imperial this year, both one and two year stock; then we want to mention some others you should consider. Richard Delicious, Boscana, Gallia Beauty, Red Rome, Cortland, Lobo McIntosh, Macoun, Early Michael, Mitten, Mon. Beauty, Honey Beauty, Dark Red Rome, McIntosh, Starr, Gandy, the variety you can grow the best in your section, and buy your trees from the BOUNTIFUL RIDGE NURSERIES.

How to figure your order on all fruit trees: 1 to 6 at each rate; 6 to 10 at 10%; 10 to 20 at 100%; 20 to 300 at 100%; 300 to 1000 or more at 1000%.

ONE YEAR Each 10 100 100
Large size, 4-6 ft., extra fine..... \$.45 \$3.50 \$20.00 \$19.00

We can especially recommend all varieties (*) starred. They have been tried and have proven themselves especially desirable and profitable to the planters.

PEACH TREES

We have exercised extreme care in the production of our peach trees this year and we are grading closer than ever to give every man who buys some of these trees the best he can possibly produce under any condition. The growing of peach trees is one of our specialties, having about 150,000 to offer the planters this year of the very best varieties now in cultivation and released for general propagation; grown so that we can assure every customer that he will receive nothing but true to name stock. An orchard planted of these trees is your assurance of a successful orchard. If your section is adapted to the growing of peaches, plant an orchard this year. It means a permanent, safe and profitable investment. If you are interested in large quantities, write to us before buying anywhere and give us the opportunity of quoting better prices than herein listed. You will always find the Bountiful Ridge Nurseries the dependable place to buy your nursery stock both from the standpoint of quality and price. All peach trees are one year old from buds grown on the hardiest seedling stock available. They are thoroughly inspected and known to be free from insects and disease.

HEDGE PLANTS

Do away with those bare, unsightly fences, walls and trellises by planting a few of these climbing vines. For a few dollars you can now make these unsightly places real beauty spots with beautiful shade and flowers.

Mr. Kemp says:

"Buy and plant good Nursery stock now. Have a safe and permanent investment that will grow in value and prepare you to reap the benefits of the better days that are bound to come in the very near future. No man knew when prices were going to go down; no one can tell exactly when they will go up. Statistics show we have reached the maximum time our present conditions usually last. There will be a radical upward swing in all values when they start. Will you invest now in something you know will grow in value and be prepared to reap the benefits of increased value; or will you wait 'till prices are up and then buy. Make your own answer to these questions. I know you want to succeed - the Bountiful Ridge Nurseries want to help you. We have the stock - both fruits and ornamentals. Prices are at the bottom. Order now and plant this Fall and next Spring. Read this entire price list carefully.
